

Assessments Arrangements

Nursery

Children for Nursery are normally seen when they are 2 and a half. Through a series of short play-related tasks, children are observed for their age and stage of communication and language development, for independence, and for engagement with other children and adults.

All parents and children are interviewed informally by the Head of the Prep School or a member of his senior team.

Kindergarten

Children for Kindergarten are assessed in memory skills, simple counting abilities and ability to follow instructions from an adult. These areas are observed in a series of short play-related tasks during which children are also assessed for language and communication development.

All parents and children are interviewed informally by the Prep School Head or a member of his senior team.
